Experience

Freelance Web Developer 2026 – present

- Built a multi-region directory site in React and TypeScript, using static site generation to pre-render company and blog pages as crawlable HTML, deployed on Vercel.

Full-Stack Developer | Wine-Searcher UK2021 – 2025

- Developed a custom Shopify-connected cart interface using JavaScript and GraphQL, improving the checkout experience and data synchronisation.
- Developed and maintained features across a large legacy codebase, spanning PHP backend logic, Oracle database queries, and JavaScript/SCSS frontend work.
- Played a key role in establishing an independent development team as one of its first members, helping define deployment processes and ways of working.
- Successfully designed and implemented a custom employee timesheet system using PHP and MySQL and hosted on AWS.
- Maintained data integrity between Oracle and Solr search indices, diagnosing and resolving query failures caused by data inconsistencies.

Education

MSc Computer Science | University of East London 2025 – 2026

AWS Certified Solutions Architect Associate | Amazon Web Services 2026

AWS Certified Cloud Practitioner | Amazon Web Services 2025

Web Development Bootcamp | _nology 2020
12-week full-time programme in React and TypeScript with agile workflows and pair programming.

BSc (Hons) Mathematics | University of Nottingham 2015 – 2019

Skills

Core: JavaScript (ES6), PHP, MySQL, TypeScript, React, AWS, REST APIs
Also experienced with: GraphQL, Oracle, HTML, CSS, Node.js
Tools: Git, GitHub, CI/CD, Agile/Scrum, Vercel, Cloudflare
AI Tools: Claude Code, Claude, ChatGPT (agentic coding, code review, architectural decisions)

Projects

FinTrack — Full-stack personal finance dashboard built with Next.js 15, TypeScript, PostgreSQL on Supabase, and NextAuth.js. Features multi-user auth, relational schema design, CSV import, budget tracking, savings goals, and compound interest calculator with Recharts.

Abney Village — Community website built with Flask, TypeScript, and Cloudflare R2. Includes custom carousel/lightbox component, contact form integration, and domain migration from AWS Route 53 to Cloudflare.

Steam Stats Dashboard — Flask/Python app consuming the Steam Web API to visualise a user's game library and per-game achievement stats using Chart.js. Deployed to Vercel.

Interests

Tennis, Skiing, Gaming, Spanish (advanced)
