- PHP (Yii2)
- Python
- Flask
- Node.js
- REST APIs
- GraphQL

Databases

- MySQL
- Oracle

Cloud and Infra

- AWS
- Vercel
- Cloudflare

Tools

- Git
- CI/CD
- Agile/Scrum
- SVN

WILL KIRKPATRICK

Software Developer

Experience

Web Developer and Systems Administrator 2021 - 2025

Wine-Searcher UK

- Developed a custom Shopify-connected cart interface using JavaScript and GraphQL, improving the checkout experience and data synchronisation.
- Played a key role in the establishment of an independent development team as one of its first members; helping to define and improve the deployment cycle and ways of working.
- Worked across a large legacy codebase on front and back-end tasks including Oracle database maintenance, PHP development, and implementing Figma designs in HTML/CSS/JS.
- Contributed across the full development lifecycle from planning and estimation through to deployment and monitoring.
- Successfully designed and implemented a custom employee timesheet system using PHP and MySQL and hosted on AWS.

Education

MSc Computer Science 2025 - present

University of East London

AWS Certified Cloud Practitioner 2025

Amazon Web Services

Web Development Bootcamp 2020

_nology

12-week full-time programme delivering a client project in React and TypeScript, with agile workflows and pair programming throughout.

BSc (Hons) Mathematics 2015-2019

University of Nottingham

About Me

Curious and self-driven software developer with a strong mathematical background and four years' experience delivering web and systems solutions across front and back-end environments.

Skilled in JavaScript, AWS, PHP, Python, MySQL, REST APIs, and modern development workflows. Known for combining analytical thinking with practical delivery, helping teams streamline processes and build efficient tools.

Now looking to apply my full-stack experience in a role where I can grow both technically and professionally.
